OUR SPECIAL TREATMENTS THIS MONTH!

COSMELAN TREATMENT

The Cosmelan Peel depigmentation treatment offers a powerful solution for those struggling with various types of skin pigmentation. With just one professional treatment and a dedicated home-care routine, the Cosmelan Peel effectively targets pigmentation concerns, including hormone-induced melasma, to visibly reduce discolouration. The results are guaranteed.

HIFU

HIFU is a non-surgical facelift alternative that uses focused ultrasound energy to heat and stimulate collagen production in the deeper layers of the skin. Collagen is a protein that provides structure and elasticity to the skin. As we age, collagen production naturally decreases, leading to wrinkles and sagging skin.

IV VITAMIN DRIP

IV Performance Booster Plus is formulated with a mixture of nutrients to help boost metabolism, athletic performance and energy. It strengthens your immune system. Can help maintain healthy muscles, bones, teeth, skin & hair.
